IOM's reintegration assistance is flexible and you will therefore have a variety of options to discuss with IOM.

There are four main reintegration options:

❖ **Start-up of a small business;**

If you choose to start your own business, IOM will help you to identify a suitable business type. The choice of business depends amongst other on your previous experience, other businesses in your area of return etc.

In cooperation with partners, IOM can offer you different vocational and educational trainings.

❖ **On-the-job training placement;**

If you choose this option, you will be employed in a business and learn the skills of the trade through working. If you receive training in which you are not paid a salary, IOM may pay your board for the duration of your training.

Through this option, IOM will through its network of partners refer you to potential employers.
